

**DESCRIPTION**

Pen Plating or stylus plating is an electro-deposition process designated to plate small touch-up areas or to perform small repair work. Depending on the area to be treated, detail work is difficult to do with immersion -plating solutions, since the time required to apply plating masking can lead to a loss in productivity. Pen plating is a perfect solution to this problem. LEGOR pen plating machine and related tools have been specifically designed to get optimum results with this type of technology.

- Accurate digital voltage control
- Easy to use
- Affordable price
- Materials resistance to both acidic and alkaline solution
- 110/220 V - 50/60 Hz
- Voltage range:1.2 - 12.0 V

**PRODUCT FORM**

D.C. rectifier power	14 V/0.5 A
Weight [kg]	0,7
Input power [V]	220/230
Dimensions [mm]	140 x 140 x 60 (h)

**DISCLAIMER**

All recommendations and suggestions in this bulletin concerning the use of our products are based upon tests and data believed to be reliable. Since the actual use by others is beyond our control, no guarantee expressed or implied, is made by Legor Group, its subsidiaries or distributors, as to the effects of such use or results to be obtained, nor is any information to be construed as a recommendation to infringe any patent.
